

You're my favorite friend  
Always there with a helping hand  
You know my heart  
And you know how much I care about you  
Other friends  
Don't always share  
Way too afraid to show their real face  
But you know what?  
You can always count on me  
No matter how you feel  
Put your hope and trust in me  
I'll be there  
Together we'll find our way back to love and peace

You are the one I would always call  
When I am about to fall

**You are my sunshine**  
**You shine like a star**  
**You make my world bright**  
**No matter where you are**  
**And I am thankful to be your friend**  
**It all comes down to real friendship in the end**

You're unsecure sometimes  
But I know what lies in you  
There's so much inside  
I see it in your eyes, you could do anything  
What your heart desires  
No matter what they tell you

Oh, this life has so much to give  
More than we could ever dream of  
With you by my side I could climb every mountain  
No matter how high

**You are my sunshine**

**You shine like a star**

**You make my world bright**

**No matter where you are**

**And I am thankful to be your friend**

**It all comes down to real friendship in the end**
